

## Link 4 Mover

### Multi-Purpose Moving Solutions

The Link 4 Gondola Moving System is designed and configured to work with your current gondola shelving system. Its unique lift brackets are available for a variety of fixture brands and the "bolt-on" design permits a quick change between the fixture brands.

We can provide customized rental or purchase options to fit your specific project needs.

#### MOVING SYSTEM BENEFITS

- Wide transfer points help and assist in enhancing stability
- Utilizes simple screw-type jack to control lift height
- Moves fully merchandised shelving units
- Portable inventory control cabinet
- Works on most brands of shelving
