

## Pallet Rack Mover HD

GONDOLA MOVING EQUIPMENT  
Pallet Rack Lifter

PRL #101

### Multi-Purpose Moving Solutions

The PRM HD Pallet Rack Mover from Gondola Train is the safest high capacity steel rack mover available today. The unique off center tilt outrigger lessens vertical tilt caused by uneven floors and transitions. The PRM HD Pallet Rack Mover is designed to move the entire rack assembly as one unit rather than individual pieces, saving time and valuable labor costs. Move with greater confidence with the Gondola Train PRM HD!

We can provide customized rental options to fit your specific project needs.

#### MOVING SYSTEM BENEFITS

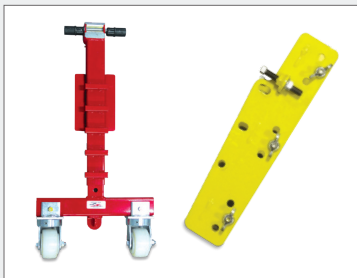

- Universal saddle
- Saddle mount 6"-24"
- Move fully assembled, partially loaded racks
- Outrigger arms reduces and assists "out-of-balance" situations

#### COMMON APPLICATIONS

- Warehouse Reconfiguration
- Pallet Racking
- Steel Racking

### System Includes

#### Lift Jack & Universal Leg Saddle

- Jack used to lift fixtures
- Saddle bolts to upright and lifts jack. Saddle is universal and is compatible with many brands of Pallet Rack Shelving.

#### Stabilizer Outrigger Leg

The outriggers leg provides unassisted upright stability and additional support for off center tilt. The outrigger will lessen the vertical tilt angles and make the fixture more stable.

#### Portable Job Box

Securely packs the PRM HD system for shipping, storage, and ease of use on the job site.
